A Recovery Curriculum: Loss and Life for our children and schools post pandemic Barry Carpenter, CBE, Professor of Mental Health in Education, Oxford Brookes University Matthew Carpenter, Principal, Baxter College, Kidderminster, Worcestershire "When will they actually go back to school?" This is the cry from many parents, as we write and there is no answer But that does not stop us

Voices & Visions

A major part of your child's journey to recovery is finding their own coping strategies It can be helpful to think of it building up a toolbox that will

help your child deal with a range of situations and feelings Everyone is different, so there is no magic formula However, you can help engage your child in this creative process Remember to trust your instincts and listen to your child

My Child's Tonsillectomy Journey

9 My Child's Tonsillectomy Journey Yes, recovery from this surgery is painful h Your child's throat will be very sore, especially in the mornings when it is dry You may notice your child avoids talking or talks softly when their throat is sore This is normal up to 14 days after the surgery h Your child's neck and nose may also hurt h Your child may also have ear pain This often

Standard for Hospital Services - NHS

The child's journey through services 17 At the heart of the modernisation agenda for the NHS (The NHS Plan (3)) is a fundamental change in the way that we think about health and social care services - a cultural shift to services designed and delivered around the person using those services and their needs, and not around organisations This means building pathways of care around the

Childhood Neglect: Improving Outcomes for Children

have different recovery needs and journeys Practitioners should not assume that if a parent's substance misuse reduces that the child's life automatically improves There must always be attention to the specific needs of the child Recovery is 'a process through which an individual is enabled to move

The Family Court and COVID 19: The Road Ahead

The Child's Journey Must Not be Delayed 10 It is part of the DNA of all professionals working in Family Justice and embodied prominently in statute that delay in decision making is likely to the prejudice welfare of a child who is subject of court proceedings [CA 1989, s 1(2) and ACA 2002, s 1(3)] There is a statutory requirement for

Home to school/college travel and transport assistance ...

o Concerns from Children's Services over the child's journey to school o An unexpected injury/operation to a parent/carer resulting in an inability to transport the child during a period of recovery o Disability, mobility or mental health needs of a child that would make it difficult for them to access public transport, even when accompanied o Where a parent's health condition would

The Children's Hospital Removal of a Chalazion Cyst

The minimum recovery time before discharge is 1 to 2 hours This is usually enough time for us to check that your child is recovering well It also gives us time to check that your child is passing urine (having a wee) after the operation In some circumstances your child may be allowed home before they have passed urine If your child has not passed urine within 6 hours of the operation
