Vol. 13, No. 6, June 2017 Happy Trials to You

“Rigor Mortis: How Sloppy Science Creates Worthless Cures, Crushes Hope, and Wastes Billions” is a gripping story about how the biomedical enterprise rests on very shaky scientific foundations And, despite its cheery title, the book proposes some things we can do about it Clinical research on a new drug is always based on a foundation of laboratory and pre- clinical (animal) research Of

Peer Review Notes May 2017

Rigor Mortis: How Sloppy Science Creates Worthless Cures, Crushes Hope and Wastes Billions Despite the disturbing title of his book and its focus on the serious problem of reproducibility of research results, NPR reporter Richard Harris recently gave a very thoughtful and well-received talk at the National Institute of Neurological Disorders and Stroke (NINDS) Why the Dire Title? Harris

THE NIH PERSPECTIVE ON RIGOR AND REPRODUCIBILITY

Predoctoral Training in Rigor “Graduate schools ‘mostly teach facts the first year,’ said Jon Lorsch, director of the National Institute of General Medical Sciences at the NIH ‘They should teach methods’”-Harris, Richard (2017) Rigor Mortis: How Sloppy Science Creates Worthless Cures, Crushes Hope, and Wastes Billions

Improving Reproducibility in Research: The Role of ...

Rigor Mortis: How Sloppy Science Creates Worthless Cures, Crushes Hopes, and Wastes Billions by Richard Harris [2] Unfortunately, these publications sensationalize the problems—some of which are real and some of which are not—and threaten to undermine public confidence in scientific research generally [3] In mid-2017, Anne Plant and Robert Hanisch conceived of a workshop that would

Reproducibility Revisited: Reflections of an Editor

science The book Rigor Mortis by Richard Harris (2017) extolled the lack of virtue in science, although I found the text to be a bit lacking in rigor itself It did describe some well-known instances of irreproducible results, but it did not sufficiently delve into underlying mechanisms that led to these disparate results For the reader lacking a sound understanding of the scientific
